

SHIVAM KUMAR

Backend Developer | Full Stack Developer

CONTACT

Phone: +91 9792079093 | **Email:** shivamkumar37j@gmail.com
Location: Lucknow, Uttar Pradesh | **LinkedIn:** linkedin.com/in/shivam-kumar-347473310
GitHub: github.com/Shivamkumar037

PROFESSIONAL SUMMARY

3rd-year B.Tech Computer Science student with strong foundation in **Java, Spring Boot, Hibernate, Spring Security, MERN Stack**, and scalable backend system development. Skilled in building secure **REST APIs**, implementing authentication & authorization, integrating relational and NoSQL databases, and designing production-ready applications. Experienced with **Docker, Redis, Kafka, MongoDB, Express.js, React.js, Node.js, Microsoft Azure**. Strong understanding of OOP, MVC Architecture, DBMS, Data Structures & Algorithms, and full-stack development.

TECHNICAL SKILLS

Languages: Java, SQL, Python, C, JavaScript, HTML, CSS
Frameworks & Tools: Spring Boot, Hibernate, Spring Security, REST APIs, Node.js, Express.js, React.js, Vite, Thymeleaf, Bootstrap, Git, GitHub, Maven, Postman, Docker, Kafka
Databases: MySQL, PostgreSQL, Redis, MongoDB
Cloud & Others: Microsoft Azure, AWS Fundamentals, Generative AI Foundations
Core Concepts: OOP, MVC Architecture, Authentication & Authorization, CRUD Operations, API Design, DBMS, Data Structures & Algorithms, Full Stack Development
Engineering Practices: Backend Development, Database Optimization, Scalable System Design, Debugging, Testing, Documentation

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern | Analyze Infotech

June 2025 – August 2025 (2 Months) | MERN Stack

- Developed a complete **Clothing E-Commerce web application** using **MERN Stack** (MongoDB, Express.js, React.js + Vite, Node.js) delivering 6 major modules within a 2-month internship.
- Designed and delivered **15+ secure RESTful APIs** covering user authentication, product catalog, category management, shopping cart, order processing, and admin operations.
- Implemented JWT/cookie-based authentication & authorization with protected admin routes, achieving role-based access control for Admin and User roles and reducing unauthorized access risks by ~90%.
- Built Admin dashboard supporting full **CRUD operations** for Products (with multi-image upload), Categories, and Order status management across 4+ admin screens.
- Developed responsive React.js frontend with product filtering, product detail pages, order history, and clean component-based architecture.
- Integrated MongoDB for data persistence and structured the backend using Controllers, Models, Middleware, Routes, and DTOs following clean code practices.

PROJECTS

Clothing E-Commerce Platform | MERN Stack (MongoDB, Express.js, React.js, Node.js) | GitHub

- Developed a full-stack e-commerce application enabling users to browse products, place orders, and admins to manage catalog and orders.
- Designed and implemented 15+ RESTful APIs for authentication, product listing with filtering, category CRUD, order creation, and admin dashboard operations.
- Implemented secure JWT/cookie-based authentication with role-based access control separating Admin and User privileges.
- Built responsive React.js frontend with product detail pages, multi-image product support, order history, and protected admin routes.

Electronic Voting Machine (EVM) System | Spring Boot, Hibernate, MySQL, Spring Security | GitHub

- Developed a secure end-to-end voting platform simulating real-world election workflows using Spring Boot, Hibernate, MySQL, and Spring Security.
- Implemented role-based authentication and authorization supporting 2–3 distinct roles (Admin/Voter) with server-side validation, ensuring 100% protected access to critical modules.
- Built voting, instant result computation, and candidate management modules with an optimized relational database schema supporting concurrent users.
- Designed scalable backend architecture following MVC principles and REST API standards with Docker containerization support.

Social Media Management Backend System | Spring Boot, Hibernate, MySQL, Redis, Docker | GitHub

- Developed a scalable backend system managing interactions between Users and AI Bots including Posts, Comments, Replies, and Likes across multiple modules.
- Implemented nested comment hierarchy and parent-child reply structure using optimized relational mapping, supporting multi-level discussions.
- Integrated Redis caching and Docker containerization, improving response times for frequently accessed data and streamlining deployment workflow.
- Designed layered architecture using Controllers, Services, DTOs, and Entities following clean backend engineering practices.

Feedback Management System | Spring Boot, Hibernate, MySQL, Spring Security | GitHub

- Built a secure feedback management platform with structured layered backend architecture using Spring Boot and MySQL.

- Implemented authentication and authorization mechanisms with Spring Security to protect 100% of sensitive endpoints.
- Developed RESTful APIs and complete CRUD operations enabling efficient feedback collection, storage, and retrieval for multiple user types.
- Designed scalable backend modules following MVC architecture and clean coding practices for long-term maintainability.

EDUCATION

Bachelor of Technology (Computer Science & Engineering)

SR Institute of Management & Technology (SRIMT), Lucknow | 2023 – 2027

CERTIFICATIONS & ACHIEVEMENTS

- Spring Boot 4, Spring 7 & Hibernate for Beginners – Udemy (35.5 hours) – April 2026
- Azure Cloud Fundamentals: Explore Cloud Services – LinkedIn Learning – April 2026
- Learning REST APIs – LinkedIn Learning – April 2026
- AWS Academy Graduate – Generative AI Foundations (12 Hours) – March 2026
- Git Training – Simplilearn SkillUp – April 2026
- SQL Course (Self Learning) – Skill Course – December 2025
- Java Complete Course Certification | PostgreSQL Database Management Certification
